

BETTER TO EDUCATE, THAN VACCINATE

Vaccines are continuously promoted as being safe, but many believe they are not safe for legitimate reasons. The following is a well-researched presentation that lists some of the valid reasons for the great concern about vaccine safety and the heated debate that has resulted.

- I. Despite the massive promotion that vaccines are safe, there is a wealth of valid evidence to the contrary.
 - A. A partial list of the health risks from the CDC's (Center for Disease Control) "Vaccine Information Statements" includes: Death, deafness, coma, permanent brain damage, meningitis, long-term seizures, very high fever, pneumonia, difficulty breathing, etc.
 - B. Many ingredients listed on the CDC's website are toxic, such as mercury, aluminum, formaldehyde, MSG, etc.
 - C. Many vaccine ingredients are contaminated. One reason might be because they are often made in China (without allowing American inspectors inside manufacturing plants).
 - D. Medications are tested via long-term, double-blind, placebo-based studies. But vaccines have been re-categorized, so traditional safety protocols are not required. Consequently, when "testing" a vaccine, they do not compare the health outcomes of a vaccinated to an unvaccinated person. Long-term vaccination safety studies have not been conducted either, so it is impossible to legitimately conclude vaccines are safe.
 - E. There have not been any studies on the health risks of injecting an individual with multiple vaccines at the same time.

- II. The death rate for polio, the measles, and many other diseases fell about 90% prior to mass vaccinations. This is due to greatly improved nutrition and sanitation in America. The documented history of these diseases prove the popular narrative promoted in the media and elsewhere is not true. Please review the facts for yourself. Dr. Blaylock's video and the "Vaxxed" DVD referenced at the end of p.2, are among the best quick-study vaccination resources available.

- III. There is plenty of proof that government agencies such as the CDC, FDA, & HHS (Health & Human Services) have grossly neglected their duty to responsibly oversee the vaccination industry. Consider a couple recent examples:
 - A. Re: CDC: Dr. Walter Thompson, PhD & Senior Scientist at the CDC (he ranks #4 of 5 in the chain of command) made startling statements – as recorded on the 2016 "Vaxxed" DVD: "We lied about the scientific findings. The CDC can no longer be trusted to do vaccine safety work. They cannot be trusted to be transparent. The CDC cannot be trusted to police itself."... "This is what I keep seeing again, and again, and again, where these senior people just do unethical, vile things and no one holds them accountable."
 - B. Re: FDA: Multiple investigations by Congress and the HHS Inspector General have consistently found the vast majority of FDA officials directly responsible for licensing vaccines, and the CDC executives who mandate them, have personal financial connections with vaccine manufacturers. These public servants are often compensated as vaccine shareholders, grant recipients, paid consultants, and occasionally patent holders of the very vaccines they approve.
 - C. Re: HHS: On June 9th, 2018, HHS conceded in federal court, Southern District of New York, that the agency neglected to study vaccine injuries, improve vaccine safety, and regularly report their progress to Congress – as required by the National Childhood Vaccine Injury Act of 1986. That is 33 years of failure to help protect our children & adults too.

- IV. Consider just some of the appalling vaccine-related statistics.

From "Americans Can Handle an Open Discussion on Vaccines" by attorney R.F. Kennedy Jr., 8/15/2019 (except #A)

 - A. In 1960, ~4 vaccines in total were on the CDC schedule. In 2019, the number has skyrocketed to **~27 vaccines by age 1** and a total of **> 70 vaccines are recommended by age 18!**
 - B. Federal law requires the package insert for each vaccine warn of "only those adverse events for which there is some basis to believe that there is a causal relationship between the drug & the occurrence of the adverse event." These inserts alert of **>400 potential injuries**, including serious neurological, immune, & chronic illnesses.
 - C. In 1986, only 12.8% of our children had chronic diseases. Since then, the figure escalated to an **alarming 54%**, in accordance with the ever-expanding vaccination schedule.
 - D. Prior to 1986, the autistic rate was 1 in 2500. Shockingly, the **rate of autism has increased to 1 in 36 today!** These statistics equate to an epidemic of more than **68,000 new cases of autism annually**.
 - E. The CDC website declares, "Vaccines don't cause autism," citing IOM's (Institute of Medicine) comprehensive 2011/ 2012 literature review of vaccination safety science. However, that IOM study and the follow-up HHS study in 2014 both state that the CDC has never performed a study to support CDC's claim that DTaP does not cause autism. The same is true for Hep B, Hib, PCV13 & IPV. Further, the CDC's study on the MMR vaccine actually ***did* reveal a correlation with autism. But the results were covered-up** by the publication of falsified data ("Vaxxed")

- F. The CDC's Vaccine Adverse Event Reporting System (VAERS), to which doctors & patients may voluntarily report adverse vaccine events, received 58,381 reports in 2018 (including 412 deaths, 1237 permanent disabilities & 4217 hospitalizations). An **HHS-funded review** of VAERS concluded, "**fewer than 1% of vaccine adverse events are reported.**" This suggests 100x more adverse vaccine events occur annually than are reported (~ 6 million).
- G. The world's most aggressive vaccine schedule has not given our country the world's healthiest children. We now rank 35th in overall health outcomes – just behind Costa Rica, making **the U.S., by most measures, including infant mortality, the sickest in the developed countries.**
- V. In 1986, pharmaceutical companies were granted financial immunity for injuries caused by their vaccines, thereby removing the primary incentive for them to manufacture safe vaccines or improve the safety of existing vaccine products.
- VI. The largest producer of US vaccines (Merck) earned >\$42 BILLION in 2018 revenue – mostly from vaccine sales. Could this enormous financial incentive be part of the cause of the proven gross negligence pertaining to vaccine safety?
- VII. An unconstitutional "vaccine court" (The Vaccine Injury Compensation Program) was established for vaccination injury lawsuits. The "court" circumvents "due process," having no judge, jury, or "discovery" procedures. Instead, a "Special Master" decides whether the petitioner should be compensated and the amount/type of compensation. Despite the ever-increasing challenges to plaintiffs, the court has paid >\$4 billion in compensation to injured parties as of 4/19.
- VIII. Many have faith-based objections or feel it is unethical for humans to receive vaccinations that include the residue from human aborted fetal tissue, biblically "unclean" mouse brains, pig gelatin, African green monkey kidney cells, moth cells, etc. These animals' DNA are also present in many vaccines.

How to Strengthen the Immune System

Complying with the "8 Laws of Health" are essential to good health. They include: Nutrition, Exercise, Water, Sunshine, Temperance, Rest, Air and Trust in God. A myriad of vitamins and herbs are available to assist with particular issues. An excellent video to learn about the most healthful diet is, "A Diet for All Reasons," by Dr. Klaper, available on Youtube.

**** **BEST MATERIAL TO STUDY THE TOPIC, IN THE LEAST AMOUNT OF TIME:** ****

1. "*The Truth about Vaccines*" video, by Dr. Russell Blaylock (on Youtube, posted by Starseed videos)
Dr. Blaylock is a neurosurgeon, health practitioner, author and devout Christian. This *excellent* video provides an in-depth analysis and general overview of vaccines in a simple manner – making use of charts, graphs, etc. to illustrate the data. The vaccination situation has worsened since it was filmed, but the principles remain the same.
2. "*Vaxxed, from Cover-up to Catastrophe*" DVD (enclosed)
Compelling statements from the CDC's Senior Scientist, doctors, politicians and others make this video very helpful to understand why the proven corruption exists in the incredibly lucrative vaccination industry. This 2016 documentary exposes the MMR vaccine's correlation to autism and how the cover-up of the actual data occurred at the CDC.

Excellent In-depth, but simply-presented books/DVDs:

1. "*Miller's Review of Critical Vaccine Studies*," **400 Important scientific papers** summarized for researchers and parents, by Neil Z. Miller
This well-documented book objectively summarizes extensive scientific evidence (citing the original sources) that demonstrate vaccines do cause harm. Just the fact that this book exists is sobering.
2. "*Vaccine Safety Manual for Concerned Families and Health Practitioners*," by Neil Z. Miller
This encyclopedic health manual contains pertinent information on every major vaccine, including detailed vaccine safety and efficacy data. It contains over 1000 scientific citations and over 100 charts, tables, and graphs for illustration.
3. "*The Truth about Vaccines*," a 7-part DVD series, by Ty Bollinger (sometimes on sale)
Over 60 of the best global vaccine experts are interviewed, including scientists, researchers, physicians, clinicians, etc. – with the goal of revealing the facts about vaccines. A transcript of the entire series is included with each set.
4. "*Vaccination, A Petition to the General Conference of the Seventh-day Adventist Church*,"
by Timothy R. Perenich DC, MA, and Michael J. Farris MS, MA
In addition to summarizing excellent scientific research on the vaccination topic, this book also provides among the best spiritual insights.
